# Why Vimanet?

Cracow is the base of Polish IT technology and are among the best in Europe. Many of the world leading IT companies are also located in Cracow.

With many years of experience with development work for leading European companies in their basket the founders of Vimanet decided to return to Cracow to start up their own business. They are now targeting the Norwegian and UK markets in which they have been worked and know from before.

- Vimanet offers its client the latest IT technology and design to very competitive prices and in time.
- IT work can easy be done and sent without any concern of distances.

If your company plan to have any IT work done let Vimanet take a look and come up with an offer.

- Software development and consulting company
- Skilled personnel
  - Microsoft Certified Solutions Developers
  - Microsoft Certified Application Developers

## ■ Internet web solutions

- Vimanet is a professional supplier of web solutions. Our programmers has many years of experience creating web applications. We can deliver the simplest and the most advanced solutions including seamless integration to other systems.

## ■ Intranet

- Custom solutions, EPiServer or MS SharePoint Server.

## ■ Interaction design

- Our interaction designers are taking care of usability at your webpage

## ■ Graphic design

- In house graphic designers are taking care of web design at all levels

- Custom software development (ASP.NET)
  - Database-driven web applications
  - E-commerce, CMS, Mashups
  - Graphic design, web usability
- Implementation services
  - Content Management Systems
  - Document Management Systems (SharePoint)
- Consulting
  - Software architecture
  - Database design
  - Information architecture (Topic Maps)

## ■ CMS (content management system)

A good CMS system is important to the product because it makes it possible for the user to change content at the webpage without any programming skills. Vimanet offer 3 different CMS system based on the client needs.

- Sitefinity
- Kentico
- EPiServer

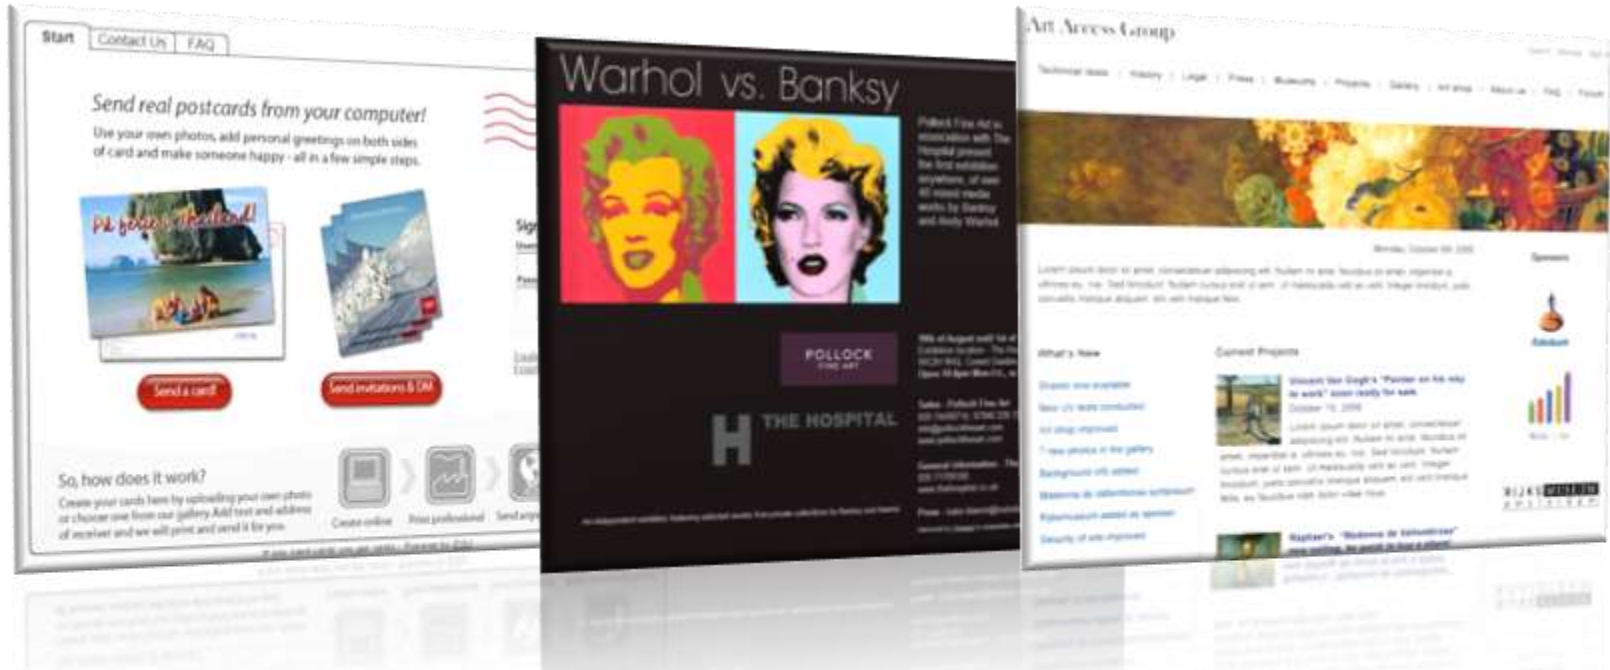

## ■ Multi lingual sites

If your company have any plans to reach the international market it is very important to make a multi lingual site from the start. With Vimanet we deliver multi lingual sites from the beginning as we are doing all sites in English and then translate to Norwegian when finished.

## ■ Search engines

Sites with lots of content can often be very difficult to navigate and a internal search system is needed. Vimanet has special expertise in this field. Mixed with advanced information architecture huge sites can still be easy to navigate.

# Samples of custom graphic design

Vimanet has in-house designers doing customized design. The big advantage is that the webpage will always perfectly fit to client needs and company profile. Disadvantage is that it is a bit more expensive and you have to add time for graphic design in development time.

# Samples of template based graphic design

Vimagnet has a wide range of template designs suitable for all types of businesses. Advantage using a template is low price and possible to make quick to launch. Disadvantages is that it is difficult to fit to company profile.

# Our Staff Experience

Vimanet is based on staff with many years of freelance work experience for profiled international companies with high demands to quality and skills.  
All personell speak fluent English.
